Fundamentals:

Earnings Trend TTM - Shows profitability growth

Loss narrowing/near break even: 10 points	First profitable year: 8 points	Stable profitability: 5 points	Deepening losses: 0 points
---	---------------------------------	--------------------------------	----------------------------

Source: Macrotrends (retrieved Jan 2026)

Duolingo shows a stable and rising EPS growth. However, due to its existing history of positive and growing EPS, it shows that profitability is likely already factored into the stock price. It earns 5 points in this category.

Institutional Ownership - In before the big players, but not entering value traps

25-40%: 10 points	40-60%: 6 points	Over 60% or under 25%: 0 points
-------------------	------------------	---------------------------------

Breakdown	
0.82%	% of Shares Held by All Insider
105.49%	% of Shares Held by Institutions
106.37%	% of Float Held by Institutions
747	Number of Institutions Holding Shares

With an institutional ownership of 105.49%, this signifies that short selling is occurring between investors and it has already been discovered by institutional investors, limiting the future growth potential. It earns 0 points in the category.

Technicals:

Support/Resistance Zones - Shows key zones where trends may reverse

Bounced off lowest support (at least 5%): 9 points	Broken through lowest resistance or second support: 6 points	Midway between support and resistance: 4 points	Below lowest support or above highest resistance: 0 points
--	--	---	--

Based on Duolingo's one year chart, there is a support line at \$167.72 and \$266.62. There are key resistance lines at \$349.56, \$445.53, and \$541.11. At its current price of \$185.15, Duolingo has started to bounce off of its lowest support line by 10.4%. It earns 9 points in this category as it demonstrates a strong trend reversal.

Chart Pattern - Identifies bullish or bearish trend reversals

Cup & handle, bullish flag, bullish triangle, or bullish wedge: 8 points	Double bottom or base breakout: 4 points	Range-bound but tightening: 2 points	No chart pattern or bullish pattern: 0 points
--	--	--------------------------------------	---

Duolingo is currently in a falling wedge pattern following a strong downtrend. This suggests that the bearish momentum is slowing down. To add to this, bullish momentum has begun to break the price out of the wedge range. This earns Duolingo 8 points in this category.

Price vs MAs - Compares current price to the average price during that period

Golden cross with price over 200MA but under 50MA: 8 points	Golden cross with price over both 200MA and 50MA: 6 points	No cross or price over 50MA: 3 points	Death Cross or Price under 200MA: 0 points
---	--	---------------------------------------	--

A golden cross has formed on January 5th, indicating that bullish momentum is increasing. The price also remains under the 50MA, signifying that there is still room for upside. It gets 8 points in this category.

RSI (14) - Determines if it is overbought or oversold using the magnitude of price changes

0-30: 7 points	31-45: 4 points	46-69: 2 points	Over 70: 0 points
----------------	-----------------	-----------------	-------------------

With an RSI of 32, Duolingo is considered oversold. This means the stock is potentially undervalued and bullish sentiment may overtake bearish momentum. It gets 4 points in the category.

Volume - Shows how many shares are traded during the period

Rising volume for 3+ green days: 8 points	Rising volume: 6 points	High volume breakouts: 3 points	Declining/flat volume: 0 points
---	-------------------------	---------------------------------	---------------------------------

Duolingo has had several high volume breakouts in the last five days, however, it has been sporadic and has not maintained bullish volume. It earns 3 points for this category.

Duolingo's Technical Score: 32/40

Duolingo's Final Score: 76/100

Duolingo displays strong fundamentals through explosive revenue growth, impressive margins expansion, stable free cash flow, and a decrease in short interest. It also shows relatively strong technicals through its chart pattern and resistance levels, however, its lack of volume signifies weaker bullish momentum.

Final analysis of Duolingo: A moderate buy of 1.5% with a price target of \$266.62 (44% upside)
